

# OneStream for SAP Customers

[This e-book first appeared on the OneStream website](#)

## Accelerating Finance Transformation

If your Finance team has immediate needs to drive agility across planning, financial close and other key processes, now is the time to consider the business value of accelerating Finance Transformation by conquering the complexity of your enterprise performance management (EPM) processes.

Before you embark on a long, expensive upgrade of your enterprise resource planning (ERP) system, it is critical to understand the differences between EPM and ERP solutions. ERP solutions such as SAP S/4 HANA help organizations “run the business” by collecting, storing, managing and interpreting transactional data from sales, hr, supply chain, etc. Conversely, EPM drive Finance Transformation by helping Finance teams “manage” their organization by enabling planning, financial close and reporting process required for agile decision and driving performance.

Download this interactive e-book to learn:

- The three clear EPM choices for SAP customers and dives into what each would ultimately mean for you and the Finance function in your organization
- Why OneStream’s unified Intelligent Finance platform is a critical foundation to conquer complexities of finance processes and support the for future growth and change in your organization
- The many benefits achieved by three SAP customers who have adopted OneStream to deliver more detailed reporting and analytics in single, unified platform while reducing total cost of ownership (TCO)
