

OneStream's Sensible ML for Intelligent Demand Planning

[This webinar invite first appeared on OneStreamSoftware.com](#)

Join our Live Demo Webinar on July 29 at 11 AM ET

The adoption of artificial intelligence (AI) and machine learning (ML) by the Office of Finance and Operations is a matter of when – not if. Both AI and ML will help Finance teams and business analysts analyze and correlate the most relevant internal/external variables that contribute to forecasting accuracy and performance across the Sales, Supply Chain, HR, and Marketing processes that comprise financial plans and results.

Join our webinar to learn how organizations are taking steps to improve demand planning by leveraging Sensible ML. Learn how Sensible ML enables Data Science for FP&A and Operations and delivers thousands of demand planning forecasts through a single, unified Intelligent Finance platform to lead @ speed and drive performance.

Attendees of this webinar will learn about:

- Why a purpose-built time-series ML forecasting solution for CPM is critical to provide the ultimate agility, scale and transparency required for granular operational planning
- Why Sensible ML's guided experience to build, deploy and consume ML models can help organizations finally take advantage of the promise of AI and ML for operational planning processes across the enterprise
- How FP&A and operations teams can reduce forecast bias and increase accuracy by unifying thousands of demand planning forecasts with driver-based P&L, balance sheet and cash flow forecasts.
- How to unleash the power and sophistication of data science across Finance and Operations at scale and at a fraction of the total cost of alternative solutions.
