

OneStream Financial Close Handbook

[This publication first appeared on OneStreamSoftware.com](#)

[NOW AVAILABLE FOR PRE-ORDER!](#) The OneStream Financial Close Handbook-written by expert authors-is a practical book for implementors, administrators, and end-users, that dives into the Financial Close with a specific focus on the Account Reconciliations and Transaction Matching solutions.

The Account Reconciliations solution is a complete package that plugs into the Financial Close Workflow to leverage data that already resides within the consolidation application, whilst Transaction Matching helps accounting teams automate the collection and matching of large numbers of transactions across multiple sources.

With these solutions, OneStream Financial Close delivers the four key pillars of a good reconciliation process: Visibility, Standardization, Efficiency and Control.

AVAILABLE THIS SEPTEMBER!
