

Organizations Can Improve Operations and Motivate Employees With the Top Enterprise Performance Management Software Providers, According to SoftwareReviews Data

[This article first appeared on PRNewswire](#)

TORONTO, Aug. 24, 2022 /PRNewswire/ - [SoftwareReviews](#), a leading source for insights on the software provider landscape, has published its [2022 Enterprise Performance Management Data Quadrant](#), naming six providers as Gold Medalists.

Enterprise performance management software, also known as business performance management (BPM) or corporate performance management (CPM), enables an organization's performance evaluation by standardizing organizational metrics and supports data-based decision making through improved planning and reporting. EPM allows businesses to examine, assess, predict, and adjust performance across all departments.

In 2022, organizations are adopting objective and key results (OKR) performance reviews as employees focus more on aligning personal, career, and business growth. This methodology is helpful for keeping staff motivated and aligned with their personal goals while meeting business objectives.

To support organizations searching for the right enterprise performance management software solution for performance tracking, visualization, and evaluation, SoftwareReviews has identified the top providers EPM for the year based on verified survey data collected from 306 end-user reviews. These providers have received high scores on SoftwareReviews' Data Quadrant.

Providers are ranked by a composite satisfaction score, called a Composite Score (CS), that averages four different areas of evaluation: Net Emotional Footprint, Vendor Capabilities, Product Features, and Likelihood to Recommend.

The [2022 Enterprise Performance Management Software](#) Gold Medalists are as follows:

- [Board](#), 9.2 CS, ranked high for ease of administration.
- [OneStream](#), 8.8 CS, ranked high for vendor support.
- [Vena Complete Planning](#), 8.7 CS, ranked high for mobile access.
- [Anaplan Platform](#), 8.7 CS, ranked high for budgeting and forecasting.
- [Workday Adaptive Planning](#), 8.6 CS, ranked high for planning and scheduling.
- [Prophix CPM](#), 8.5 CS, ranked high for financial reporting and consolidation.

SoftwareReviews' comprehensive software reviews provide the most accurate and detailed view of a complicated and ever-changing market. The data comes from real users who use the software day in and day out and IT professionals who have worked with it intimately through procurement, implementation, and maintenance.
