

Leading at Speed in Operational Analytics and Signaling

[This event invite first appeared on OneStreamSoftware.com](#)

Friday, September 30 | 11 AM ET

Join us for an overview of OneStream's capabilities for operational analytics and reporting, further enabling finance and business leaders to take advantage of the weekly and daily signals across the organization to drive performance before the month-end close and beyond.

In this webinar, you will learn:

- Financial Signaling — Blend granular operational analytics from multiple sources with financial data to analyze your organization's critical signals and KPIs on a weekly or even daily basis to drive performance ahead of month-end. Create a fully unified and seamless analytics experience designed and owned by finance.
- Self-Service Dashboards — Easy-to-build, drag-and-drop visualizations for real-time access to trusted data in OneStream and other data sources.
- Financial Statements and Management Reports — Accurate, easy to create, maintain and share.
